Introduction

Information Technology (IT) – business alignment enables the organisation's to adhere to business objectives and to maximise the value from investments. At Abangane, we support Information Technology Assimilation projects, IT Systems Acquisition and Implementation projects, IT projects post-implementation reviews, IT Risk Management and IT Compliance Reviews.

Our approach to IT consulting is underpinned by our IT Strategy Framework, which captures the knowledge, methods, tools and techniques of our clients and the projects they have implemented. We have used this methodology to deliver reviews and technology-enabled transformations for several clients across a range of industries; it is proven, and it is effective. With our approach, organisation's undergo major undertakings to transform business practices and systems based on industry best practices and comprehensive IT infrastructure and applications strategy.

Your Trusted Digital Partner

The company was formed by professionals with practical experience and extensive exposure in the governance and management of Information Technology. In the future, people involved with the company will be both young and mature; experienced and qualified business graduates and engineers.

The resource personnel working in the company aim to provide reliable support services and consultancy to a wide variety of corporate houses either in the capacity of executive or as a business partner or consultant. The bottom line of the company philosophy is building a long-term business partnership with its clients where interpersonal relationship, reliability, and assured quality of solutions and services.

02
